

THE EQUAL SIGN

The equal sign represents relationships in our number system.

Example: $3 \times 5 = 10 + 5$

Recognize that the equal sign says the left side of the sign is equal to the right side

Questions

1. QUESTION

Type **True** or **False** for the following mathematical statements.

$5 + 2 = 7$

$3 + 7 = 7 + 3$

$8 = 10 - 1$

$4 + 5 = 8 - 1$

$9 + 5 = 14 + 0$

$3 + 5 = 4 \times 3$

2. QUESTION

Complete the following statements.

$5 + 2 =$

$12 \times 2 =$ $+ 4$

$\square - 3 = 5$

$126 - 37 =$ $- 40$

$\square = 12 - 5$

$5 \times 28 = 10 \times$
