

REVIEW

Solve the following equations.

1. QUESTION

Solve the following equations.

$$x + 2 = 6$$

$$x = \boxed{}$$

$$5x = 100$$

$$x = \boxed{}$$

$$35 - n = 28$$

$$n = \boxed{}$$

$$x \div 3 = 9$$

$$x = \boxed{}$$

2. QUESTION

Solve for x.

$$2x - 25 = 35$$

$$\text{Answer} = x \text{ is } \boxed{}$$

3. QUESTION

Solve for x.

$$90 + (a \div 4) = 115$$

$$\text{Answer} = a \text{ is } \boxed{}$$

4. QUESTION

The area of a plot of land is 780 sq. metres. If the length of plot is 26 metres, what is the width?

Answer = _____

5. QUESTION

How many 125 ml of cups of juice will fill a jug that can hold 2 litres of juice?

Working:

Equation:

$$125 \times c = \boxed{} \times \boxed{}$$

$$125 \times c = \boxed{}$$

$$c = \boxed{} \div \boxed{}$$

$$c = \boxed{}$$

Answer = $\boxed{}$ cups will fill the jug.
