

ESTIMATING 2

Exercises to help you develop your estimation skills.

1. A school orders religious workbooks each term for five classes. There are 34 students in the first class, 29 in the second class, 34 in the third class, 26 in the fourth class, and 41 in the fifth class. Estimate the number of religious workbooks the school will order.

Answer = _____

2. At Sheila's Salon, Macy can schedule about 17 people for haircuts each week. How many people can Macy schedule for the month? Estimate your answer. Type your answer in the space provided below.

Answer: Macy can schedule about _____ people for the month.

3. Luke mows lawns in his neighbourhood. He mows four lawns each month. Mr. Brown gives him \$95, Mr. Castillo gives him \$123, Mrs. Lalla gives him \$115, and Mr. Smith gives him \$184. Estimate the amount of money Luke will earn after 5 months? Approximate to the nearest hundred.

Answer: Luke could earn _____ after five months.

4. Daniela likes to watch television. Her mom told her to approximate the amount of time she spends watching television. This is what Daniel found in the first week. Round your answer to the nearest 10.

Days	1	2	3	4	5	6	
Hours	3	3	4	3	3	7	

Answer= _____
