ODD AND EVEN NUMBER

A number is even when pairs can be made. A number is odd when pairs cannot be made.

A number is odd when pairs cannot be made, one is always left over.

Note: Observe the following operation. Do you get an **odd** or **even** number?

$$2 + 6 = 8$$

$$3 + 6 = 9$$

$$3 + 7 = 10$$

$$5 + 7 = 12$$
