Date: _____

Measuring a door using a non-standard unit

Measure the length of your bedroom door.

Draw your bedroom door in the space below. Then use the length of a new pencil and measure the height of your actual bedroom door. When measuring the height, you can begin at the bottom and go the top. Place the pencil in a straight line from end-to-end, with no overlaps and no gaps. Then write the height of the door.

The height of my bedroom door is: _____ pencils
