

POLLUTION QUIZ 1

1. Cars also release high concentration of _____ from its exhaust pipes.
 - carbon monoxide
 - DDT
 - Oxygen
 - Nitrogen
2. Styrofoam products, aerosol cans and (old) refrigerators contain a chemical called _____ which damage the ozone layer and expose the earth to more harmful ultraviolet radiation.
 - DDT Dichlorodiphenyltrichloroethane,
 - oxygen
 - chlorofluorocarbons
 - fossil fuels
3. With all the water around us, less than _____ is accessible.
 - 25%
 - 80%
 - 1%
4. Pollution can cause:
 - Spread of diseases
 - Water shortages
 - Animal extinction
5. Match the following.

SORT ELEMENTS

 - the release of contaminants can cause respiratory problems.
 - the deposition of waste in the soil.
 - can trap animals making them unable to fly.

Air pollution	
Land pollution	
Water pollution	

6. How long does it takes a plastic bottle to decompose?

- 450 years
- never
- 50 years
- 2 weeks

7. Why is it important for farmers to dispose of animal carcasses safely?

- To avoid contaminating groundwater.
- To save time and money.
- To make sure other livestock do not feast on the carcass.
- To make sure the carcass is not stolen.
